

Safe 1

FACE SHIELD FOR COMBINATION WITH HEARING PROTECTOR

In many work situations you need hearing and face protection, but not a helmet. Safe 1 offers a comfortable way of mounting a face shield with a simple hand grip on one of Hellberg's head band protectors. This also applies to the electronic EPS protectors, but not the POP protector.

Safe 1 can be used for grinding, turning, wood cutting and work with a clearing saw.

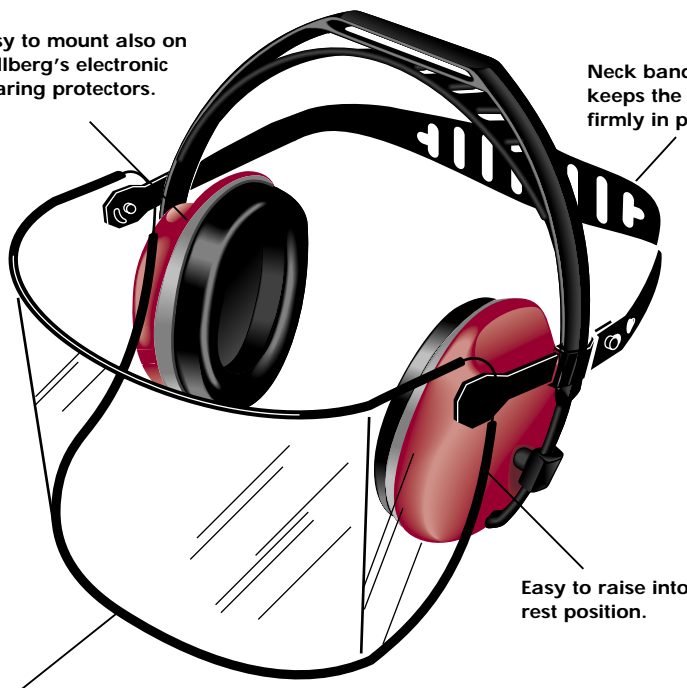

World news!

Hellberg's new face shield with hexagonal honeycomb holes, which has been etched from stainless spring steel, transmits 3 times more light than a traditional wire net. The difference is like working with or without sunglasses.

Easy to mount also on Hellberg's electronic hearing protectors.

Neck band that keeps the protector firmly in place.

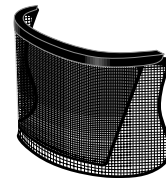

Easy to raise into rest position.

Easy to change between Hellberg's large range of face shields.

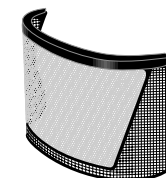

Some of our most common face shields

Clear face shield.

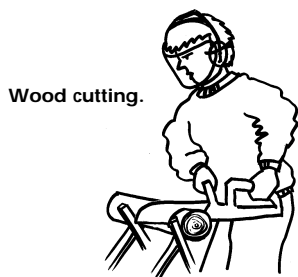

Net face shield, available in 3 different types; nylon, metal, etched.

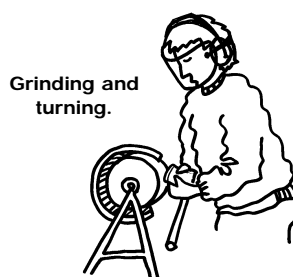

Etched steel net, which gives 3 times better light transmission than net face shields.

EXAMPLES OF AREAS OF USE

Wood cutting.

Grinding and turning.

Work with a clearing saw.
