

# Safe 2

## FACE SHIELD IN COMBINATION WITH HEARING PROTECTOR ON A HELMET

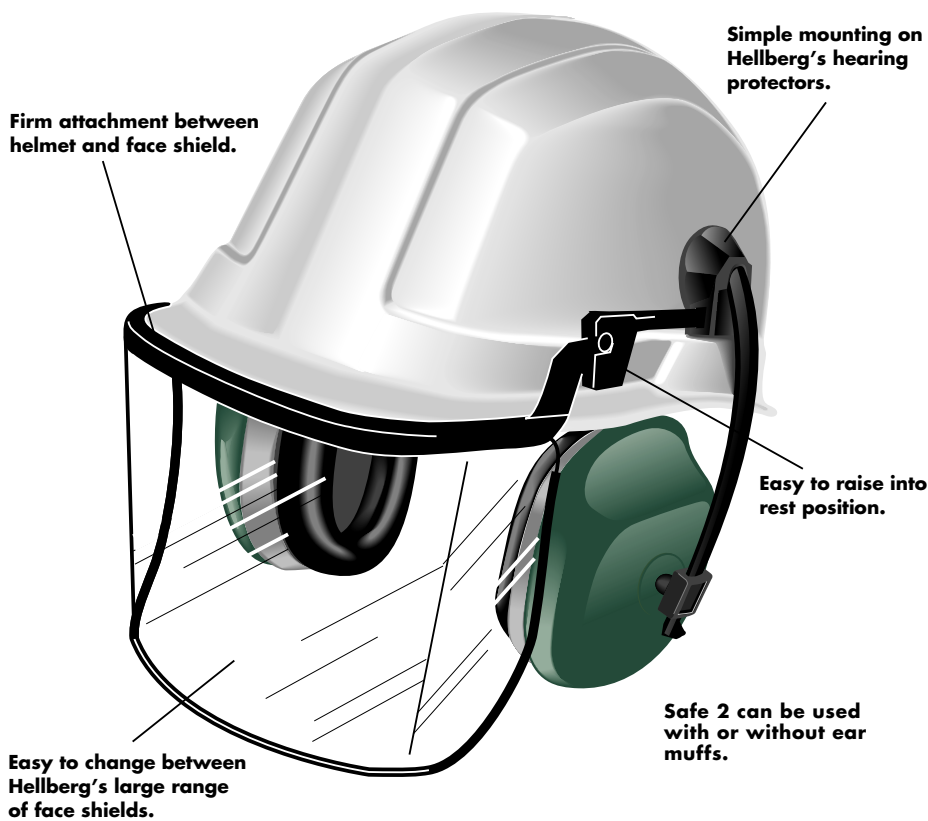

Safe 2 is Hellberg's program of face protection for helmet mounting. Thanks to a genial construction it is easy to mount and dismount the face shield, as well as to raise into rest position. It is intended for forestry work, heavy industry, building industry, mining, etc.

Safe 2 does not conduct electricity and is therefore suitable for electric work. The design of the face shields gives maximum protection from spatter from the front, from underneath as well as from either side.

### World news!

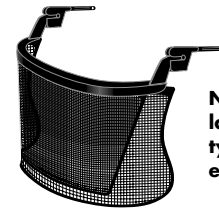

Hellberg's new face shield with hexagonal honeycomb holes, which has been etched from stainless spring steel, transmits 3 times more light than a traditional wire net. The difference is like working with or without sunglasses.

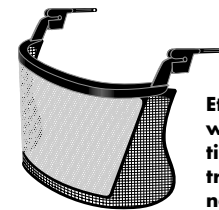

### Some of our most common face shields

Clear face shield.

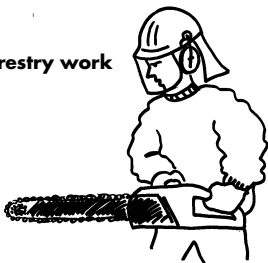

Net face shield, available in 3 different types; nylon, metal, etched.

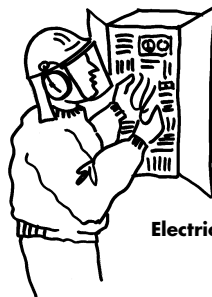

Etched steel net, which gives 3 times better light transmission than net face shields.

### EXAMPLES OF AREAS OF USE

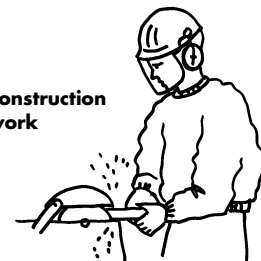

Forestry work

Electric work

Construction work
