

Safe 3

BROWGUARD FOR PROTECTING FACE AND FOREHEAD

Safe 3 is Hellberg's face shield program for work situations, in which you do not need a helmet, but in which face and eyes must be protected from spatter and splash, for instance from chemicals.

The face shield holder has recesses above the ears, which makes use with hearing protection possible. It is adjustable to different head sizes and it is firm yet comfortable to wear.

World news!

Hellberg's new face shield with hexagonal honeycomb holes, which has been etched from stainless spring steel, transmits 3 times more light than a traditional wire net. The difference is like working with or without sunglasses.

Strong forehead protector, which withstands blows or hot grindings, for example from an angle cutter.

Adjustable headband.

Easy to raise into rest position.

Neck band of elastic ribbon keeps the protector in place.

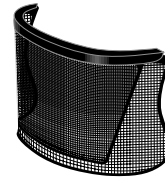

Easy to change between Hellberg's large range of face shields.

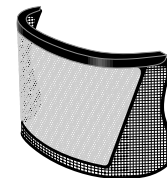

Some of our most common face shields

Clear face shield.

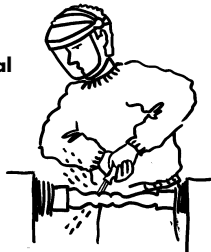

Net face shield, available in 3 different types; nylon, metal, etched.

Etched steel net, which gives 3 times better light transmission than net face shields.

EXAMPLES OF AREAS OF USE

Wood and metal turning.

Chemical work with splash risk.

Work with hot sparks.
